Description

JCB's 14 tonne excavator, the JCB JZ140 is an extremely productive reduced tail swing tracked excavator. A reduced tail swing design offers you greater levels of safety than a conventional excavator because manoeuvrability is superior, especially in restricted spaces. The JZ140 is a quality excavator built in Britain.

However, the benefits don't end there. You'll find that a JCB JZ140 excavator is an extremely efficient and innovative machine, with the latest EcoMAX engine and state-of-the-art hydraulics fitted. What's more, the cab and controls are incredibly intuitive, ergonomic and comfortable, while you'll also find this excavator very easy to service and maintain.
