Description

The JCB JS20MH wheeled material handler is designed to provide maximum productivity and maximum safety first and foremost. To maximise productivity, the JS20MH produces its peak power and torque at low revs and, to extend uptime, there are countless durability and maintenance-saving features. This wheeled material handler also provides a comfortable – and therefore productive – operator environment.

To make sure the JS20MH, its operator and your site are protected, this machine is equipped with a range of standard safeguards, and there's an equally impressive list of optional safety extras too.
