Description

JCB understands that a wheeled loading shovel is a crucial part of any on-site process. For this reason, the new JCB 411 wheel loader is built on a foundation of quality and reliability.

It's also designed to perform great feats of productivity, offering superb performance without the time-consuming inconvenience of a DPF. Perhaps the biggest change to this wheel loader is the introduction of JCB's latest Command Plus cab, which means, quite simply, best-in-class comfort, visibility, ergonomics and quietness. Expect superior serviceability and safety too.
