

467 ZX WHEEL LOADER

Brand: JCB

Call for Price: 08 89473490

Short Description

Max Engine Power 239Kw

Operating Weight Range 23800kg

Bucket Capacity 4.2m³

Description

There are many reasons to choose the top-of-the-range 24-tonne JCB 467 ZX wheel loader . It's productive, efficient, easy to maintain and extremely durable.

The 10.8 litre 6 cylinder Cummins QSM11 engine is Stage 3a/Tier 3 compliant and produces high power (216 kW) and torque (1478 Nm) at low revs. That helps the 467 ZX front-end loader to increase productivity by up to 40% and lower fuel use by up to 20%.

There's also an intelligent clutch cut-off feature that gives maximum hydraulic performance and limits vehicle speed when loading.
