Brand: JCB

Call for Price: 08 89473490

Short Description

Max Engine Power 81kW

Max Lift Capacity 2500kg

Max Lift Height 5.8m

Description

The JCB 527-58 Wastemaster is a hugely efficient EcoMAX-powered telehandler. It has a footprint designed for load-bearing and stability.

Four equal sized wheels improve tractive effort for excellent loader performance, while soft ground flotation and ground clearance are first class. Permanent 4-wheel steer and 4WD, together with a compact machine size, means an exceptionally tight turning circle for great manoeuvrability and handling in small yards.

Naturally, a tough design is common to all JCB telescopic handlers but Wastemaster models take it to a new level. Extra guarding for the cab and lighting are standard, as is underbelly protection. There's also an uprated 126 l/min variable flow piston hydraulic pump to cope with the rigours of waste and recycling duties.
