Short Description

Max Lift Capacity 3500kg

Capacity at 2m Reach 2400kg

Max Lift Height 4.4m (4.35m for 4wd Option)

Description

The TLT35 telescopic forklift is a strong and exceptionally versatile performer. Weighing between 5100 and 5500 kg (depending on spec), these industrial forklifts have a choice of standard 2WD or optional 4WD.

A 46 kW engine is fitted to this reach forklift. Lift capacity is 3500 kg and lift height is 4.4 m (4.35 m for 4WD option).

Our telescopic forklift design has a wealth of benefits, not least the fact that, because the long reach enables single side truck loading, you could save up to 50% loading space in congested yards. That space can, of course, be used to create pedestrian zones in yards. What's more, this small forklift's long reach also keeps operators clear of hazardous environments like furnaces or chemicals.

In short, the TLT35 telescopic forklift raises more than just loads; it raises the standard for all forklift trucks.
