

275 - 600 KVA GENERATORS

Brand: JCB

Call for Price: 08 89473490

Short Description

Engine Scania

Engine Emissions Fuel Optimised Stage IIIA

Frequency 50/60Hz

Description

JCB's 275-600kVA power range uses the superior Scania engine to provide both fuel optimised and Stage IIIA models. If you need a reliable power source to deliver maximum uptime and optimised operating efficiency then a Scania engine is a great choice.

At JCB we understand that your power requirements can vary greatly across applications and industries. JCB generators provide the flexibility to be able to deliver the right power solutions for the right job.

The preference for alternative fuels is becoming more and more common and our range of Scania generators can be run with alternative fuels to suit market preferences.
