Brand: JCB

Call for Price: 08 89473490

Short Description

Operating Weight 3651kg

Max Dig Depth 3.512m

Max Dump Height 3.482m

Description

JCB's **3.5 tonne excavator**, the 8035 ZTS mid-sized mini excavator is a true zero tailswing machine offering everything that a conventional tailswing does, with a larger undercarriage than the 8025.

The 8035 ZTS weighs 3651 kg, and a powerful 1.7 litre Perkins 23.6 kW engine is mounted to a stable undercarriage that's carefully matched to the dig envelope for optimum performance and added safety. The undercarriage and dozer blade on this JCB mini digger are designed to ensure that debris doesn't build up underneath or in front of the machine to slow you down.

A two-speed tracking motor provides a top tracking speed of 4.3kph as well as excellent tractive effort and traction. The 8035 ZTS compact excavator also has single-acting auxiliary pipework as standard; additional tie down points make it easier to strap the machine onto trailers; and rubber tracks are offered as standard.
