

5022 MAN-DOWN ELECTRIC STORAGE

Brand: Linde

Call for Price: 08 89473490

Short Description

1.0 - 1.35 tonnes capacity

Electric Motor

Ideal for Storage

Description

With various comfortable and adjustable seat options, the side seated operation allows the truck operator to have excellent vision during both forward and reverse traction of the truck. This driving position also allows the operator to park the truck in aisle, and exit the cab safely. The cabin is also equipped with different storage compartment options to suit individual customer requirements. The Linde system control (LSC) represents a significant advance in the smart control of Man down VNA trucks.
