

# V08 ELECTRIC ORDER PICKERS

**Brand:** Linde

**Call for Price:** 08 89473490

## Short Description

0.7 - 1.0 tonnes capacity

Electric Motor

Ideal for Order Picking

## Description

There are two versions available of the V08 with a compact chassis width of 800 mm. The model V08-01 comes with fixed forks welded to the operator platform, for working with walk on pallets where as the model V08-02 comes with supplementary lift on operator platform and the forks are welded to the fork carriage. The platform & pallet can be raised to the most convenient working level for picking and comes with a wide access of 431 mm (V08 "Supplementary lift") and low step-in height (135 mm). Both models are equipped with the OptiLift® system to provide fully proportional lifting as well as quiet operation. Lowering can be controlled by a foot switch & ensures soft landing of the forks that protects the load when lowering.
