

# V ELECTRIC ORDER PICKERS

**Brand:** Linde

**Call for Price:** 08 89473490

## Short Description

1.1 - 1.2 tonnes capacity

Electric Motor

Ideal for Order Picking

## Description

Unique modular design allows the perfect specification for each individual application. Combination of different lift motors, drive motors, chassis, masts, batteries, cabins, etc. to suit every application. Two voltage variants provide the perfect solution to customers needs: 48V for high performance in medium and heavy duty applications and 24V variant for low to medium duty applications. Specially designed side barriers for optimal order picking. Deadman pedal hidden under suspension floor mat to avoid trip hazard. Platform is suspension mounted and has a floor mat designed to absorb shocks and vibration. Very spacious cabin due to integrated control panels for maximum freedom of movement.
